PROFESSIONAL SUMMARY

Technically strong B.Tech CSE undergraduate (CGPA 8.2/10, Batch 2027) with hands-on experience in full-stack web development, system design, and data structures & algorithms. Proficient in Python, JavaScript, ReactJS, and Django, with a growing expertise in Machine Learning fundamentals. Selected for Amazon ML Summer School 2025. Passionate about building scalable, user-centric software solutions and contributing to engineering teams that value precision, innovation, and continuous learning. Open to SDE, frontend, backend, data, ML, and QA engineering roles.

KEY SKILLS

Languages	Python, JavaScript (ES6+), HTML5, CSS3
Frameworks	ReactJS, Django, Bootstrap
Tools & DevOps	Git, GitHub, VSCode, Google Sheets, Microsoft Excel
ML / AI	ML Fundamentals, DSA, Algorithms — actively learning
CS Core	OOP, SDLC, Manual Testing, Bug Reporting, System Design
Soft Skills	Attention to detail, documentation, cross-team collaboration, analytical thinking

EXPERIENCE & LEADERSHIP

Field Data Collection Associate | Indian Oil – Data Collection Project | 2025 | India

- Conducted structured data collection and reporting across pipelines — demonstrated data accuracy, QA discipline, and documentation skills.
- Performed systematic quality checks ensuring data integrity; maintained records of findings and timelines.
- Coordinated with team members to meet targets, reflecting reliability in deadline-driven environments.

Volunteer | Muskurahat Foundation – NGO | Ongoing | India

- Organised community programs requiring structured planning, documentation, and cross-functional coordination.

Active Member | National Service Scheme (NSS) | Ongoing | India

- Developed team collaboration, leadership, and communication skills through diverse social development projects.

PROJECTS

Bhasha Setu – Language Learning Web Application *HTML5 | CSS3 | JavaScript*

- Designed and developed a responsive, mobile-first language-learning web platform with cross-browser compatibility.
- Built intuitive UI with modular components, accessibility focus, and clean architecture following front-end best practices.
- Implemented QA checks on UI components to ensure specification compliance and consistent user experience.

Smart Traffic Management System *System Design | JavaScript | Architecture*

- Architected a conceptual smart traffic monitoring system with real-time data flow pipelines and scalable design.
- Applied ML-inspired IoT pipeline concepts; demonstrated analytical thinking from problem identification to solution modelling.
- Produced structured technical documentation and clear architectural diagrams for the system.

Analytics & Automation Dashboard *Python | Excel | JavaScript*

- Built a KPI tracking and reporting framework with automation logic, reducing manual data processing effort.
- Integrated data visualisation concepts and metric dashboards for campaign/performance monitoring.

EDUCATION

B.Tech – Computer Science Engineering | 4th Year, 7th Semester | Expected 2027

CGPA: 8.2/10

ACHIEVEMENTS & CONTINUOUS LEARNING

- Selected for Amazon ML Summer School 2025 — recognised for ML aptitude and algorithmic problem-solving.
- Maintained CGPA 8.2/10 consistently across the B.Tech CSE programme.
- Actively pursuing Machine Learning Fundamentals and Data Structures & Algorithms through self-directed study.
- Built multiple full-stack and system-design projects demonstrating end-to-end engineering capability.
- Regular open-source contributor; stays current with web and ML technology trends.

AREAS OF INTEREST

Software Engineering | Frontend Development | Machine Learning & AI | System Design | Data Analytics | QA & Testing | Open Source

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
